

Keep 'Em Clear

Hydrant, Manhole Access is Important

Hide and seek? No thanks!

Manholes and fire hydrants aren't the most visually appealing parts of the Township, but they must remain clear to ensure they can be easily accessed.

Township residents are asked to avoid covering manholes and water valve boxes with landscaping, as doing so can make accessing the sewer systems and water valves complicated. It also causes valuable time to be lost during emergencies.

Additionally, residents can also do their part in making hydrants easily found by keeping them clear of shrubs, trees, and landscaping. This includes two feet behind the hydrant and five feet on each side.

Nothing should be planted between the hydrant and street.

Help us keep our sewer and water systems running smoothly!

What's the Flush? Why Hydrant Program is Needed

It's a sign of spring: hydrant flushing in Cranberry Township. But why?

Flushing removes sediment from the water system, checks hydrant operation, and tests chlorine levels in water lines.

Flushing is conducted from 7 a.m. to 4 p.m. Monday through Friday. Discolored water and fluctuations in water pressure are normal. Refrain from doing laundry when neighborhood lines are being flushed. After a reasonable time, if the water does not clear or return to normal pressure, call Customer Service at 724-776-4806.

PAVING PROGRAM HITS THE ROAD

The Township's annual paving, seal coating, and crack sealing program is underway.

Using innovative technology, the Township's roads have been meticulously categorized and scored. The software provides Public Works with high-resolution photos and precise location information for each 10-foot section of road. That data works in conjunction with other programs to assign scores which dictate areas of greatest need.
