**Kelly, Board Mark Infrastructure Improvement Funding**

U.S. Rep. Mike Kelly, R-16th, recently met with Cranberry Township officials to discuss an ongoing project to improve the Township's sanitary sewer system.

Kelly was instrumental in securing \$960,000 for the Franklin Acres Pump Station project, as well as \$1,250,000 for the Route 19 waterline replacement project.

- The Franklin Acres Pump Station and force main were constructed in the late 1970's and close to reaching their working life expectancy. The new infrastructure represents the Township's continued investment in the future of the community with ongoing support from State and Federal legislators.
- The Route 19 project will ensure every business in and around the corridor has access to a safe, reliable community water source. More than 700 workers are employed at various restaurants, shops, and offices adjacent to Route 19. The Congressionally Directed Spending funds support phase 1 of the project, which completes the waterline replacement along Route 19 from Dutilh Road to Rochester/Wisconsin Road and includes replacements off Route 19 on Brandt Drive, Smith Drive, and Wisconsin Avenue.
